

```
#include<stdio.h>
int folks(int* money){
    *money=100;
    return *money;

}
int main(){
    int my_money=200;
    printf("folks say %d \n",folks(&my_money));
    printf("i still need %d \n", my_money);
    return 0;

}
```
